Hi Samantha,

I wasn't sure who I should send comments too, so I am just sending it to you. Let me know if there are others you need me to send this to.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP) The document is attached with a few comment bubbles. Thanks!

Subject: Formaldehyde: NCEA Executive Review Committee

Hi Teneille,

You have been identified as a reviewer for formaldehyde, specifically looking at the *toxicology cancer hazard and MOA sections*. Michael Wright is looking at the epidemiology cancer hazard and Catherine Gibbons is specifically looking at the upper respiratory tract and LHP cancer MOA. You do not have to specifically coordinate with them but I wanted you to know they others are looking at the various pieces of the assessment. Although the draft assessment (attached) does not include a table of contents, you can go to the "View" table and select "Navigation Pane" and you can maneuver through the assessment that way.

The comment deadline is Friday, July 8th. We will have a meeting to discuss major issues/comments with the larger group soon after that.

Let me know if you have any concerns.

Thanks,
Samantha

Subject: Formaldehyde: ERC Review

Hello all,

The draft formaldehyde assessment is ready for review by the Executive Review Committee (ERC). John Vandenberg, Lynn Flowers, Vince Cogliano, and Gina Perovich have agreed to serve as reviewers. I will be adding a number of other reviewers to target several areas within the assessment (more to come) but didn't want to delay in getting this to the ERC. Attached are clean drafts of the toxicological review and supplemental information (i.e., appendices). Please note that these documents have not yet undergone tech edit, and all of the callouts to tables, figures, and other sections are not included. Additionally, while these documents are clean (i.e., no track changes), there are a few comment bubbles remaining to note some items the team is still working to address. The other attachment details several topics raised for ERC review; these are briefly highlighted below. **Comments are due by June 22nd**; please cc' all on this email with comments. An ERC meeting will be scheduled for shortly after the 22nd.

Highlighted topics covering assessment approaches for ERC reviewers to consider

Main Highlights

- Use of systematic review methods.
- Organizing principles.
- Modeling of cancer risk.

Additional Highlights

- PODs and UFs
- RfC determination
- Endogenous formaldehyde
- BBDR modeling of rat tumor data
- Formaldehyde Concentration in Exhaled Breath

Thanks,
Samantha
